

How to install

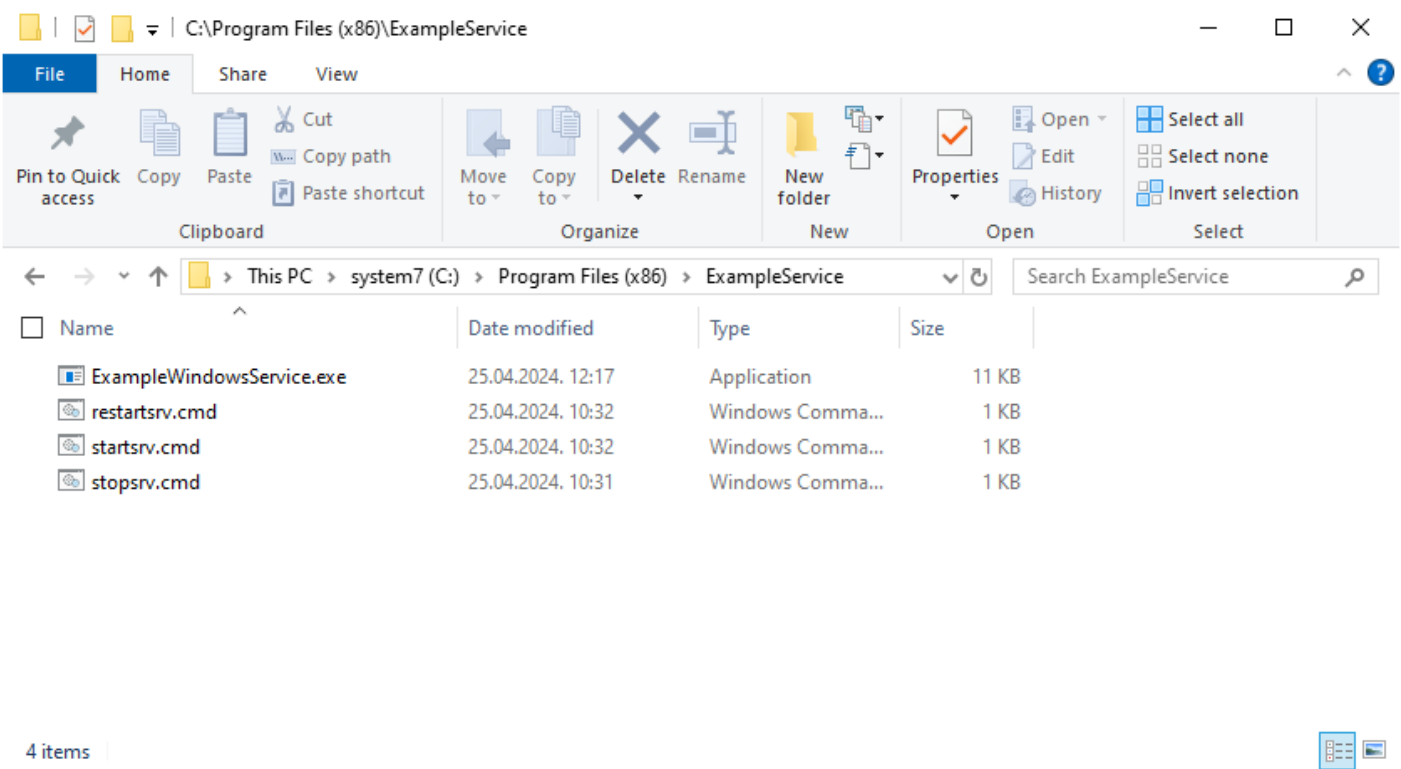

After a successful build, the installation file will be generated in the folder
".\ExampleWindowsServicePackage\bin\en-US\ExampleWindowsServicePackage.msi"

Note:

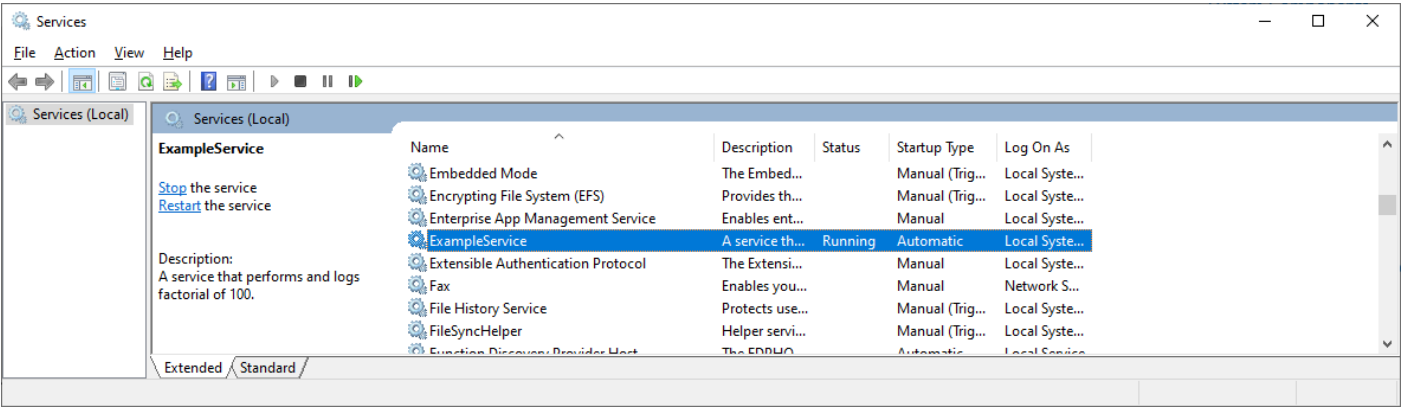

On destination computer check that exist folder “C:\temp”.

Run ExampleWindowsServicePackage.msi and click yes on windows User Account Control dialog.

Application will be automatically installed on Program Files folder.

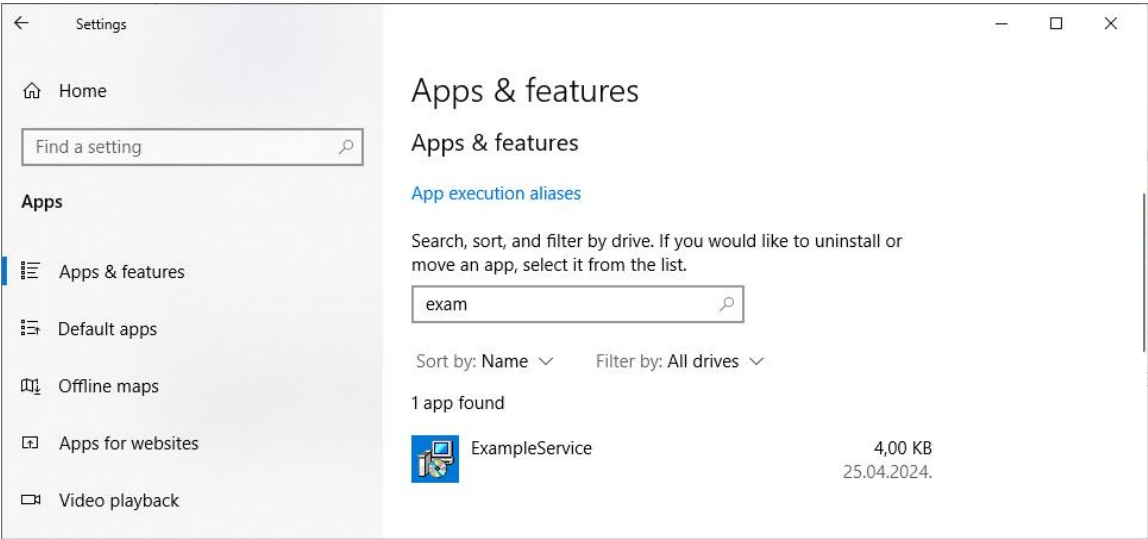

If you open windows service console, you will see that new service named “ExampleService” has installed.

Open folder c:\temp, and you will see output log from installed windows service application

On the Control Panel you can see that “ExampleService” application installed.

There are no shortcuts created on Start Menu and Desktop.
